Github: https://github.com/Sreekanth-Reddy1729 Mobile: +91 9398881472

SKILLS

Languages:	C++, Python, SQL, Linux
AI/ML & Frameworks	Machine Learning, Deep Learning, PyTorch, Hugging Face Transformers, LangChain, LangGraph, NLP, GenAI
Tools/Platforms	Jupyter Notebook, Google Colab, Github, Kaggle
Cloud & Database	MySQL, AWS
Soft Skills	Problem-Solving, Team Player, Adaptability

INTERNSHIP

AI Intern | Infosys Springboard | Hybrid | GitHub Nov' 25 – Dec' 25

FinanceInsight – Financial Named Entity Recognition using FinBERT

- Implemented a FinBERT NER pipeline in PyTorch to extract 9 financial entities with an 87% F1-score (85% precision, 89% recall).
- Processed 19,880 financial records using Python, pdfplumber, and Regex into BIO-tagged datasets and structured JSON.
- Created a Streamlit app for real-time PDF entity extraction, automating manual financial data entry workflows.

PROJECTS

SreeGPT – Agentic AI Chatbot | GitHub Nov' 13

- Developed an agentic AI chatbot using LangGraph, LangChain and Google Gemini, supporting intelligent conversations and real-time streaming.
- Implemented RAG using ChromaDB for document retrieval, context-aware question answering and conversational memory
- Integrated Tavily web search and SQLite for real-time information retrieval and persistent conversation history.
  Tech Stack: Python, FastAPI, LangGraph, LangChain, Google Gemini, RAG, ChromaDB, SQLite, Tavily, Docker

MemIQ Intelligent Memory for Conversational AI | GitHub May' 24

- Created a multi-user conversational AI assistant with persistent memory, enabling context-aware responses across sessions with per-user memory isolation.
- Engineered a memory pipeline with vector search and LLM-based summarization to retrieve relevant past conversations and generate concise context-linked insights.
- Built a ChatGPT-style web app featuring dynamic topic classification, persistent chat history, file uploads, real-time web search, and cross-device state sync.
  Tech Stack: Python, Flask, Groq API, LLaMA 3.1, FAISS, SentenceTransformers, SQLite, Google Drive

RESEARCH WORK

Risks of Misinterpreting Agile Velocity in Software Project Management: A Narrative Review with Worked Examples

Completed Academic Manuscript (Unpublished)

- Conducted a narrative review of Agile velocity and its interpretation in software project management, examining the risks of using it as a direct measure of team productivity and project performance.
- Developed worked examples illustrating velocity interpretation and its implications for project planning and decision-making.

TRAINING

Centre for Professional Enhancement, Lovely Professional University | Github Jun' 26 – Jul' 26

Artificial Intelligence: From Basics to Agentic AI

- Completed a structured summer training program on Artificial Intelligence, progressing from foundational concepts to advanced Agentic AI systems and architectures.
- Gained practical exposure to core AI/ML principles, prompt engineering, and the design of goal-driven AI agents.

CERTIFICATIONS

Oracle Agentic AI Certified Foundations Associate | Oracle Jul '26
Microsoft Applied Skills: Generate Reports with AI Research Agents | Microsoft Jul '26
Oracle AI Database Certified Foundations Associate | Oracle Aug' 26

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology — Computer Science and Engineering; CGPA: 8.17 Aug' 24 – Present

Narayana Junior College Tirupati, AP
Intermediate — Percentage: 96.9% Mar' 22 – May' 24

Narayana E.M School Vempalli, AP
Matriculation — Percentage: 92.3% Mar' 21 – May' 22
